

Mayuresh Talewar

Full Stack Engineer (AI/LLM) | React.js | Next.js | Node.js | Python | FastAPI | RAG | AI Agents

Pune, Maharashtra, India | +91 9511742415 | mtalewar2002@gmail.com | [linkedin.com/in/mayuresh-talewar-06242223a](https://www.linkedin.com/in/mayuresh-talewar-06242223a) | github.com/Mayuresh-Talewar | portfolio-delta-rouge-21.vercel.app

Professional Summary

Full Stack Engineer with 2+ years of experience building production-grade web applications and Generative AI (GenAI) products with React.js, Next.js, TypeScript, Node.js, Python (FastAPI) and PostgreSQL. Currently building enterprise SaaS products at Crestline Intelligence: an AI Meeting Assistant, an agentic AI Smart Email platform, a Material Management System and an AI-powered Project Management platform, running on Retrieval-Augmented Generation (RAG) pipelines, vector databases (pgvector, Pinecone) and Large Language Model (LLM) APIs (OpenAI, Google Gemini). Skilled in REST API design, system design, real-time systems, Redis caching and performance optimization.

Technical Skills

- **Core Competencies:** Full Stack Development, Generative AI Application Development, LLM Integration, System Design, Real-Time Systems, Performance Optimization, SaaS Product Development
- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, React Native (Expo), Redux, Context API, Tailwind CSS, Responsive Web Design
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, WebSockets, Server-Sent Events (SSE), API Testing, JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), Rate Limiting, Caching
- **Generative AI / LLM:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Agentic Workflows, Tool Calling / Function Calling, LLM Response Streaming, Human-in-the-Loop AI, LLM-based Text Classification, OpenAI API, Google Gemini API, LangChain, Embeddings, Semantic Search, Prompt Engineering
- **Databases:** PostgreSQL, MongoDB, Supabase, Redis, Vector Databases (pgvector, Pinecone)
- **Cloud & DevOps:** Vercel (Cloud Deployment), Docker, CI/CD (GitHub Actions), Linux, Hostinger
- **Tools & Practices:** Git, GitHub, Agile/Scrum, Code Reviews
- **Integrations:** Razorpay (Payment Gateway), Twilio, Fast2SMS, EmailJS, Google Maps API

Professional Experience

Full Stack Developer | Crestline Intelligence Pvt. Ltd. | Pune, Maharashtra | Aug 2025 – Present

- Built an AI Meeting Assistant: an organization-aware AI agent that joins live meetings, provides real-time guidance, auto-generates action items and recommends assignees using RAG over company knowledge, reducing post-meeting follow-up work by ~50%.
- Engineered an agentic AI Smart Email platform with OAuth 2.0 inbox integration that classifies incoming mail by sender type (vendor vs. client) and drafts context-aware replies from past conversations, supporting manual, human-in-the-loop (AI draft-and-route) and fully autonomous modes; cut email handling time by ~45%.
- Architected Retrieval-Augmented Generation (RAG) pipelines on PostgreSQL/pgvector (Supabase) with OpenAI and Google Gemini APIs, covering embeddings, semantic search and prompt orchestration, with sub-second retrieval across 10,000+ documents.
- Created a Material Management System for the full procurement lifecycle, from purchase order (PO) creation and approval to warehouse stock-in, with AI-assisted document drafting and automated approval routing, lowering manual processing time by ~40%.
- Optimized API performance by designing REST APIs with Express.js and FastAPI and adding Redis caching, decreasing average API response time by ~35%; contributed to code reviews and production deployments.
- Shipped 3+ production web applications and 3+ business websites and maintain 2 live platforms; currently developing an AI-powered Project Management platform end-to-end (React.js, Next.js, Node.js, FastAPI, PostgreSQL).

Frontend Developer | Softtronix Software Solution Pvt. Ltd. | Nagpur, Maharashtra | Sep 2024 – Jul 2025

- Crafted responsive, cross-browser web interfaces with React.js, TypeScript and Tailwind CSS for 4+ client projects.
- Integrated 10+ REST API endpoints in collaboration with backend developers, ensuring reliable frontend–backend data flow.
- Standardized reusable UI components and UI/UX patterns across projects; improved page load performance by ~25% through rendering and cross-browser optimizations.
- Delivered the SK Film Production website with EmailJS contact forms and Google Maps API, using lazy loading, memoization and image optimization; client inquiries increased by 60%.

Full Stack Developer Intern | Technology World Creator Pvt. Ltd. | Pune, Maharashtra | Mar 2024 – Aug 2024

- Developed full-stack MERN (MongoDB, Express.js, React.js, Node.js) modules with reusable, modular components to speed up feature development, along with interactive React.js and Redux UI components that boosted user engagement and session time.
- Implemented JWT authentication with role-based access control (RBAC), securing 15+ protected routes and backend services.
- Designed and tested RESTful APIs with Node.js and Express.js for reliable frontend integration.
- Automated billing and customer communication by integrating Razorpay payments and Twilio SMS/email notifications.
- Guided 4 junior contributors on Git workflows and modular code while participating in Agile sprints and peer code reviews via GitHub Projects.

Projects

TechAgri - B2B Agricultural Marketplace | React.js, Node.js, Express.js, MongoDB, Razorpay, Fast2SMS

- Launched a full-stack MERN platform connecting farmers with Common Service Centers (CSCs), with role-based access for 3 user roles (farmer, CSC, admin).
- Connected the Razorpay payment gateway and Fast2SMS OTP authentication, and built REST APIs for product listings and order management.
- Deployed to production on Hostinger with SSL and 99%+ uptime.

Shadow Monarch - AI Code Review Tool | React.js, Node.js, Express.js, OpenAI API, MongoDB

- Leveraged the OpenAI API to build an LLM-powered code review tool that returns actionable suggestions in under 2 seconds, shown as syntax-highlighted, diff-style changes.
- Added API rate limiting in Express.js and React Context for global state to prevent API overuse and race conditions.

Education

B.Tech in Computer Science Engineering | G H Rasoni University, Borgaon, Madhya Pradesh | Mar 2024 | CGPA: 7.89/10

Diploma in Computer Engineering | Anjuman Polytechnic, Nagpur, Maharashtra | Mar 2021 | Score: 75%
